Caloocan City, Metro Manila

Computer Engineering Sophomore with strong interest and foundational experience in building scalable systems utilizing cloud solutions and ensuring software development best practices.

SKILLS

Languages: Python, Javascript/Typescript, C, C++

Version Control System: Git and Github

Backend & Databases: Node.js, Express, GCP Cloud SQL, Supabase

A.I. Tools: Google Antigravity IDE, MCP Servers, Local LLMS

Cloud & Infrastructure: Google Cloud Platform, PROXMOX, Docker, Linux System Administration

Frontend & UI Design: React Library, Figma, Tailwind CSS

EXPERIENCE

Resources and Education Office Committee Member, AWS User Group e:Novators Philippines **2026 - Present**

- Assisted in creating learning resources, supporting educational initiatives, and helping deliver impactful knowledge-sharing programs.

Cloud Solutions Learning Head, Google Developer Groups - PUP **2024 - 2026**

- Supervised the curriculum design and organization of learning materials for Cloud Solutions Team with over 40+ participants, focusing on cloud architecture and core services using Google Cloud Platform.

- Conducted technical "Study Jams" guiding participants through hands-on labs and practical cloud implementation scenarios.

Front-End Developer, Google Developer Groups - PUP **2026**

- Implemented frontend authentication pages (sign-in, sign-up, and one-time-password) in collaboration with UI/UX Team for the "GDG Nexus" project, a centralized web platform serving as the primary resource hub for all organization members.

- Project Link: https://gdgpup.org/

Front-End Developer and UI/UX Designer, Ligaya **2025 - 2026**

- Led the UI/UX design and front-end development of Ligaya, a pet care coordination progressive web app developed during the CodeKada Online Hackathon. Designed a user-centric interface optimized for managing health records and daily routines, and engineered the responsive front-end architecture to deliver a seamless, accessible experience across all devices.

- Project Link: https://ligaya.app/

PROJECTS

CpE_OS: Interstellar CPU Scheduling Simulator **2026**

- A Scheduling Simulator featuring algorithms for Disk Scheduling, Memory Allocation, Virtual memory, and CPU Scheduling. Made for Operating Systems Course Project
- Built using Next.js, Tailwind CSS, and Docker containers for collaborative development
- Features PDF and Image export for Scheduling Results

- Project Link: https://cpu-scheduling-algorithms-interstel.vercel.app/

DSA_Mall: Data Structures and Algorithms Simulator **2025**

- A Data Structures and Algorithms Simulator featuring Stacks, Queues, Binary Tree, Binary Search Tree, and Recursion. Made for Data Structures and Algorithms Course Project
- Built using Vanilla HTML, CSS, and Javascript

- Project Link: https://dsa-mall.vercel.app/

EDUCATION

Polytechnic University of The Philippines - Sta. Mesa Manila **2024 - Present**
Bachelor of Science in Computer Engineering

Mater Carmeli School - Novaliches, Quezon City **2012 - 2024**
Elementary, Junior High School, and Senior High School

Mercedarian School - Novaliches, Quezon City **2009 - 2012**
Pre-School and Elementary
